OBJECTIVE

IT undergraduate specializing in backend development and AI/ML, with hands-on experience building LangChain, LangGraph, and RAG-based applications. Demonstrated problem-solving ability with 1600+ competitive programming solutions . actively seeking SDE or AI/ML engineering roles.

SKILLS

Technical Skills C/C++, Python, SQL.

Web Technologies: JavaScript, NodeJS, Express.js, MongoDB, HTML, CSS3.

Core Subjects: Data Structure and Algorithms, DBMS, Object Oriented Programming

AI & ML : Machine Learning, Langchain, Langgraph, RAG.

Cloud & DevOps : AWS (EC2, S3,Lambda ,CloudWatch)

EDUCATION

Pranveer Singh Institute of Technology

2022 – 2026

Bachelor of Technology, Information Technology (Percentage: 75.58%)

Kanpur, Uttar Pradesh

Sunbeam School

2021 – 2022

Higher Secondary Education (Percentage: 68.6%)

Ballia, Uttar Pradesh

Sunbeam School

2019 – 2020

Secondary Education (Percentage: 78 %)

Ballia, Uttar Pradesh

PROJECTS

SMART ATTENDANCE SYSTEM USING FACE RECOGNITION

Tech Stack: Python, OpenCV, Python, Machine Learning, SQL

- Built a face recognition pipeline using OpenCV and a trained ML model (e.g. LBPH/dlib/FaceNet) with a SQL-backed attendance store .
- Designed and deployed a modular 5-module desktop application (Student Registration, Face Capture, Model Training, Live Recognition, AI Chatbot) with a unified dark-themed Tkinter GUI.
- Created an intuitive web interface for real-time attendance monitoring and secure access, increasing user engagement by 40%.

AI Chatbot with RAG & Tool-Augmented LLMs

Tech Stack: Python, LangChain, LangGraph, RAG, Streamlit, DuckDuckGo Tool, REST APIs, SQLite3

- BImplemented RAG pipeline with document chunking, HuggingFace embeddings, and FAISS-based vector retrieval; evaluated answer quality using relevance and faithfulness metrics.
- IDesigned multi-step agentic workflow in LangGraph with tool-augmented reasoning (web search + stock API), retry logic, and session-isolated persistent memory via SQLite3.
- Developed an interactive Streamlit frontend with secure API key handling and session/thread-based state management.

LIBRARY MANAGEMENT SYSTEM

Tech Stack: / Node.js, Express.js, MongoDB, EJS

- Developed a Library Management System with book issuance, returns, and real-time availability tracking.
- Created a responsive UI using EJS and Bootstrap for smooth user interaction.
- Implemented user detail storage and automated fine calculation for overdue returns.

CERTIFICATIONS

- Salesforce Certified Agentforce Specialist (Salesforce)
- SQL complete Bootcamp Form Basics to advanced (UDEMY).
- The C++ 20 Masterclass : From Fundamentals to Advanced (UDEMY).
- Master Node.js: Udemmy (UDEMY).

ACHIEVEMENTS

- Secured a globalrank of 86 in Starter153 among 34,000 participants, reflecting strong competitive skills.
- Solved more than **1600+ problems** across multiple online platforms like **LeetCode**, **GeeksforGeeks**, **CodeChef**.
- In Top 11.39% in LeetCode, Attained 3-star rating on CodeChef.
